

# The Economics of a National HCV Strategy

*Join the Center for Health Economics and Policy in welcoming Dr. Benjamin Linas for a discussion about the results of his work investigating clinical outcomes and the cost-effectiveness of expanding guidance to screen for HCV infection in the United States.*

## Dr. Benjamin Linas, MD, MPH

Assistant Professor of Medicine and Epidemiology  
Boston University

**March 28, 2017 | Noon - 1:00 pm**

15122 Northwest Tower  
Medical Campus

### About Benjamin Linas

Dr. Benjamin Linas is a physician scientist dedicated to improving the health of vulnerable persons living with HIV and HCV infections. His research investigates the comparative- and cost-effectiveness of interventions to identify and treat HIV and HCV, employing methods of computational biology and clinical epidemiology. His aim is to maximize the benefits of evolving therapies for HIV and HCV in the “real-world”, where resources are constrained and the best methods for managing infected individuals are not certain.
